

Information Security Policy Statement

TrustID defines information security as the protection of the confidentiality, integrity, and availability of information in order to ensure business continuity, minimize business risk and maximize return on investment and business opportunities. This policy and the risk assessment output provides a framework for setting information security objectives, which are derived from a series of metrics which measure the effectiveness of the ISMS.

TrustID is committed to securely delivering products and services which meet client requirements and to achieving continual improvement in how we manage information security.

We also commit to:

- Compliance with all legislation, regulations, codes of practice and all other requirements applicable to TrustID's activities.
- The provision of all resources; inclusive of equipment, trained and competent staff and any other requirements to enable defined information security objectives to be met.
- The assurance that all employees are made aware of their individual obligations in respect of the information security policy and TrustID's information security Management System.
