

### **TrustID Net Zero Commitment**

TrustID is committed to achieving Net Zero emissions by 2050 for emissions scope 1, 2 and outsourced Scope 3 operations. Achieving net zero means we will reduce the greenhouse gas emissions from our operations as far as possible and ensure overall we have no impact on greenhouse gases in the atmosphere.

We will be working with our suppliers to reduce our Scope 3 emissions towards having a positive impact in our supply chain. Our training and development schemes will include information on reducing our Scope 1 and 2 emissions through energy efficiencies such as heating and lighting management, and we will support our team members to use such knowledge and skills in saving energy and reducing emissions at home too.

We will continue to develop and review our Remote Working policy and explore options to help employees minimise travel requirements.

The commitment was made on 11th March 2024 by the approving Senior Management Team.

Signed:

**Tony Machin**

**CEO**

Date: 11<sup>th</sup> March 2024.
